Company Description

Hub Controls is the home of Happy Heating. We are proud of our award-winning energy-saving, smart thermostat, the Hub Controller, which is the only one of its kind in the market that gives customers control over their utility bills. At Hub Controls, we care about making a difference in our customers' lives, helping them save their money and their planet. We also care about our people, we want them to work in an inspiring yet relaxed environment, where they are a valued part of a high-performing team. Are you ready to make a difference? As part of our expansion, we are looking to hire an HVAC Installer/Service Tech for our Binghamton, NY office for an immediate start to join our fast and flexible development team reporting to our Head of Technology.

Compensation & Benefits

- 22 days of paid vacation to start
- Competitive salary (50K – 100K) depending on experience
- Early entry into a growing start-up in an expanding field
- Potential management opportunity
- Remote hybrid work environment
- Flexible hours

Job Description

As an HVAC installer, you will be expected to accurately and efficiently install the Hub Controller smart thermostat in customer homes. You will be part of a team, integral to the design of projects, testing, and revisions. As part of a growing team, the HVAC installer will also be responsible for coordinating installs and managing installation time effectively. In addition, you will be expected to schedule installs along with service requests.

Desired Skills and Experience

- 2+ years of residential HVAC installation experience, Subcontractor experience preferred
- Must know all residential HVAC codes for the US
- Must be able to operate independently, a work vehicle is preferred
- Must pay strong attention to detail
- Must have excellent customer service skills, sales experience highly preferred
- Must possess excellent time-management skills

Primary Responsibilities

- Install and service the Hub Controller in residential homes
- Respond to service requests
- Inform customers on how to properly operate the system
- Inform customers of the benefits of using the Hub Controller
